

# Digital Smiles Increase Case Acceptance

Smile Design increases case acceptance because your patients can try out their new smile before it's permanent. Using the latest digital design technology, Paramount crafts aesthetic smiles that harmoniously integrate the patient's facial features into the restoration.

# How does Smile Design work?

Smile Design is a service offered by Paramount Dental Studio to create a digital image and physical try-in of your patient's new smile.

## 1. You capture patient's teeth and face

Take photos of patient

Scan/impress unprepped teeth

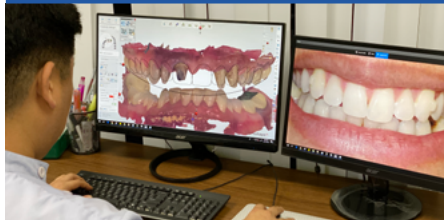

Send photos and scan/impression to Paramount

## 2. Paramount crafts the perfect smile

Paramount designs crowns taking into account the patient's facial features

\$15 PER UNIT DIGITAL DESIGN

Paramount prints model of digital design

\$45 PER PRINTED MODEL

Paramount creates putty matrix from printed model

FREE

Paramount sends model and matrix to you

## 3. You engage the patient

You create a try-in from putty matrix

Patient tries the new smile before it's permanent

You send request for final restoration to Paramount

## 4. Smile Design success

Hundreds of happy patients are testimony to the success of Paramount's Smile Design.

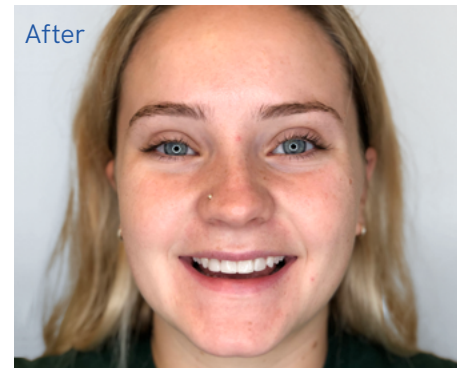

Dentists report more excited patients and higher case acceptance rates.

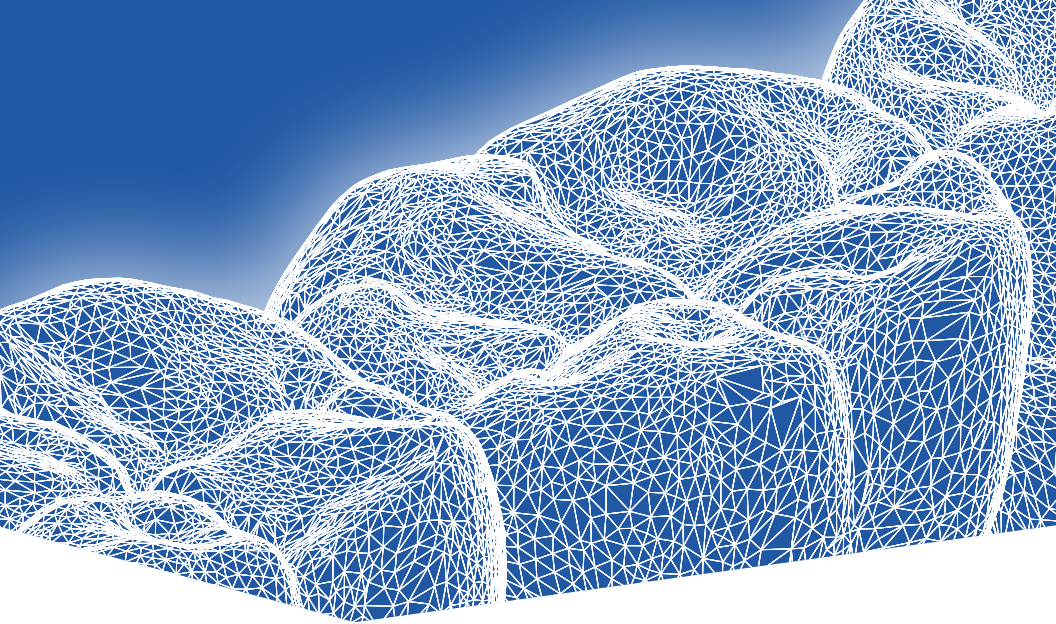

A real patient's transformation with Smile Design

Before

After

Paramount Dental Studio is an independent, veteran-owned national dental laboratory with 38 years of experience. All products are 100% designed and manufactured in the USA by lab techs trained by dentists.

Smile Design is only one of the innovations in the dental lab work that Paramount Dental Studio is implementing in its portfolio to offer top-notch solutions for digitizing the dental lab industry. Discover the possibilities at [www.paramountdentalstudio.com](http://www.paramountdentalstudio.com).
